

CHILDREN'S WELLBEING:

Child Protection

Throughout our program and daily activities we provide opportunities for children to develop strategies to help them feel safe and empower them with the ability to seek help when they feel unsure or unhappy about a situation.

We talk to the children about feelings of uncertainty, appropriate/inappropriate touching and behaviours, people who want us to keep secrets and keeping their bodies private to others.

The staff in the centre have all been trained in Child Protection and are mandated to report any incidents of which they are made aware by a child or adult. Parents who volunteer to be involved at the Preschool on a regular basis are required to have Relevant History Screening and also do a Responding to Abuse and Neglect Volunteer training.

Our staff and volunteers are guided by our Interactions with Children Policy which is available for you in our Policy folder. If you have any questions or concerns please see Helen or Wendy.

Injuries

If your child has a serious injury and requires immediate outside medical attention, staff will contact you or your emergency contacts. An ambulance will be called if appropriate.

In the case of your child injury we will always advise you, (even if considered 'mild'). Minor injuries will be treated by staff, all of whom have current First Aid training. An injury report will be given to you at the end of the day and also sent to child care when applicable. If you seek medical attention for your child, please let staff know so we can amend our records appropriately.
