

2023 Kadina Preschool Quality Improvement Plan

Challenge of Practice

If we as educators use increasingly complex language to connect and communicate, then we will strengthen children's everyday conversations to initiate and maintain reciprocal relationships through purposeful play.

Actions

- Educators will participate in Professional learning using the Talk, Play , Read resource
- Educators will plan intentional learning experiences that promote team work and communication
 - Educators will collect observational data about childrens' skills and strengths

Success Measure

We will see children:

- Talk more often, in more places and with more people at preschool
- Use words along with non-verbal skills to negotiate, problem solve and communicate ideas with peers
 - Use longer sentences and new words in context
 - Contribute their ideas and experiences in play, small and large group discussions
- Develop sustained play experiences with a purpose or goal

Goal: To strengthen children's everyday conversations to initiate and maintain reciprocal relationships.
