

Curriculum: We use the Early Years Learning Framework for Australia as our curriculum guide. Children are seen as capable and competent learners and we endeavour to provide an emergent curriculum following and planning from children's interests. Real life learning and the natural environment are a key focus. The surrounding community is seen as a learning resource and we welcome any suggestions for learning experiences from parents. Educators work with children to follow and extend their interests and learning and we reflect and plan fortnightly for children on an individual and small group basis.
