

## **Staffing**

The Centre's most valuable resource is the staff team who have a range of qualifications and experience in working with young children. They care for and respect children and in our warm and nurturing environment, they are able to identify and respond to individual children's developmental and learning needs.

The minimum required adult/child ratio set by Licensing and Standards will always be maintained.

Ongoing professional development for staff is actively encouraged, so regular relievers are employed whenever possible to provide continuity and stability for children, staff and families.

## **Mandatory Reporting**

Our Centre is committed to the prevention of child abuse and neglect. All staff members at the Centre are mandated notifiers and are obliged by law to report any suspicions of child abuse and/or neglect. You are encouraged to come and talk to the Director about any concerns you may have, as the needs and care of young children is paramount.
