Bushfire Action Plan

Kirton Point Children's Centre is situated adjacent to a scrub block and hence has a high risk bush fire rating.

We therefore have in place a Bushfire Action Plan to ensure so far as is reasonably practicable the safety of our staff, children, families and community.

The Bushfire Action Plan is reviewed by staff and roles and duties discussed and allocated. Bushfire Safety drills occur each term and all families are notified when the Bushfire Action Plan is published.

Fire ban days, total fire ban days, catastrophic fire danger days, etc. will all be assessed as per the information from the Country Fire Service.

We also monitor when fires are in the local district or are threatening to impact the site. Procedures are in place to deal with all of these situations.

We also have procedures to deal with the period immediately after a bushfire has impacted our site.

It is important to note that should an emergency situation arise and either SAPOL or the CFS take control of the situation all staff must comply with their instructions.

If a CATASTROPHIC fire danger rating is forecast then the centre will closed.
