

Kirton Point
Children's Centre
for Early Childhood
Development and Parenting

Medication

Under no circumstances is medication to be packed in your child's bag, as children have access to bags. Staff are unable to administer any medication, including asthma medication, unless the appropriate forms have been completed. These forms require a doctor to complete some details and to sign the form which is then passed on to the Director.

We provide 30+ sunscreen for children at the Centre. If your child cannot use this sunscreen please advise staff. You will need to provide an alternative sunscreen to leave at the centre for your child to use.
