

Our Philosophy

At Largs North Kindergarten we have created a welcoming and engaging learning environment where the diversity and individuality of each child is nurtured and celebrated to support their development, growth and learning.

We take pride in our community and strive to form and foster meaningful relationships between children, educators and families. The wellbeing of each child is our priority.

We believe children learn best through play and start their kindergarten journey with a wealth of knowledge and ideas about the world. We empower the children to have a genuine voice as competent and capable learners and we work collaboratively and passionately with them to encourage their ideas, theories and wonders whilst embracing their sense of self.
