

## **PROGRAMME**

Children grow and learn best in a safe and caring environment. Staff use the routines, planned activities and child initiated play as learning experiences. We believe that children have a voice in their learning, children learn, practice and develop skills best through play and staff continually support and challenge children through interactions.

Each term a term overview is prepared which gives a direction for the term's programme. A programme based on the National Early Years Learning Framework is then prepared based on the needs of the children, interests and special events. Please see a staff member if you did not receive a term overview at start of each term. We also work in partnerships with the school with the Kids Matter Program, Kimochi's, Mind up and run parental workshops to assist Parents with information with children's emotional well-being.
