

OUR IMPROVEMENT PLAN

GOAL:

What do we want to achieve?

To develop children's
NUMBER SENSE:
their fluidity and flexibility to
manipulate numbers

CHALLENGE OF PRACTICE:

Why do we want to do this?

If we plan for and provide scaffolded number learning experiences, then children's understanding of number to quantify will improve.

ACTIONS FOR IMPROVEMENT:

How are we going to do this?

We will deepen educator's numeracy knowledge and develop children's sense of what numbers mean, with particular focus on the following areas:

- notice quantity as an attribute
 - use the standard number system
 - use quantification to describe and compare
 - divide or combine quantities to form new quantities
- 
-
