

OUR PHILOSOPHY

AT THE MANOR FARM KINDERGARTEN, WE BELIVE THAT.....

1

Children are competent, capable and resourceful. Each child is an individual and has a right to actively initiate and make decisions about their learning.

2

Play is essential to children's learning and development. Through rich play experiences, children organise and make sense of their world and develop positive dispositions for life and learning.

3

The kindergarten curriculum needs to be flexible, child centred and responsive to children's individual interests and levels of development. The learning environment needs to have a sense of joy and happiness; encourage exploration and imagination and incorporate elements of the natural world.

4

The diversity of all people needs to be celebrated, acknowledged, respected and valued.

5

Building positive and respectful relationships with children, families and the community is essential. This happens when we work together and value each other's contributions.
