## Sun Protection Policy

### Rationale

A balance of ultraviolet (UV) radiation exposure is important for health. Too much of the sun's UV radiation can cause sunburn, skin and eye damage and skin cancer. Sun exposure during childhood and adolescence is a major factor in determining future skin cancer risk.

Too little UV radiation from the sun can lead to low vitamin D levels. Vitamin D is essential for healthy bones and muscles, and for general health. Sensible sun protection when UV is 3 and above does not put people at risk of vitamin D deficient.

### Objectives

This sun protection policy has been developed to:

- encourage children and staff to use a combination of sun protection measures whenever UV Index levels reach 3 and above
- work towards a safe outdoor environment that provides shade for children and staff at appropriate times
- assist children to be responsible for their own sun protection
- ensure families and new staff are informed of the centre's sun protection policy.

### Legislation

This policy relates to the following National Law and Regulations:

- *Education and Care Services National Law Act 2010*
  - Section 167—Protection from harm and hazards
- *Education and Care Services National Regulations 2011*
  - Regulation 100—Risk assessment must be conducted before excursion
  - Regulation 113—Outdoor space—natural environment
  - Regulation 114—Outdoor space—shade
  - Regulation 168: Policies and procedures (2)(a)(ii)—sun protection.
  - Regulation 170—Policies and procedures to be followed
  - Regulation 171—Policies and procedures to be kept available
  - Regulation 172—Notification of change to policies or procedures
- *Health and Safety Act (2012)*

### National Quality Standards

All of the following sun protection procedures link to:

- Quality area 2: Children's health and safety.

There are also links to:

- Quality area 1: Educational program and practice
- Quality area 3: Physical environment

Policy updated: May 2021

Policy endorsed: May 2021

Policy to be reviewed: May 2022

- Quality area 5: Relationships with children
- Quality area 6: Collaborative partnerships with families and communities
- Quality area 7: Governance and leadership

### **Procedures**

Staff are encouraged to access the daily sun protection times on the **SunSmart app, myuv.com.au or bom.gov.au/ sa/uv** to assist with implementing this policy.

We use a combination of sun protection measures for all outdoor activities during 1 August until 30 April and whenever UV radiation levels reach 3 and above at other times. Extra care is taken during the peak UV radiation times and outdoor activities are scheduled outside of these times where possible. A combination of sun protection measures are considered when planning outdoor activities such as excursions and water based activities.

### **Clothing**

When outside, children are required to wear loose fitting clothing that cover as much skin as possible. Clothing made from cool, closely woven fabric is recommended. Tops with collars and elbow length sleeves, and knee length or longer style shorts and skirts are best. If a child is wearing a singlet top or dress they are required to wear a t-shirt/shirt over the top before going outdoors.

### **Sunscreen**

- SPF 30 or higher, broad spectrum, water resistant sunscreen is available for staff and children's use.
- Sunscreen is applied at least twenty minutes before going outdoors and reapplied every two hours if outdoors.
- Families with children who have naturally very dark skin are encouraged to discuss their vitamin D requirements with their GP or paediatrician.
- Children, once old enough, are encouraged to apply their own sunscreen under the supervision of staff.

### **Hats**

All children are required to wear hats that protect their face, neck and ears, i.e. legionnaire, broad-brimmed or bucket hats. Baseball or peak caps are not considered a suitable alternative.

**Please remove any drawstrings or cords from hats as these are a safety issue!**

### **Shade**

- The availability of shade is considered when planning excursions and all other outdoor activities.
- Children are encouraged to use available areas of shade when outside.
- Children who do not have appropriate hats or outdoor clothing are asked to play in the shade or a suitable area protected from the sun.

### **Sunglasses**

The Cancer Council SA recommends the use of close fitting, wrap-around sunglasses that meet the Australian Standard AS/NZ 1067:1.2016 (Sunglasses: lens category 2, 3, or 4) and cover as much of the eye area as possible. Novelty tinted glasses do not protect against UV radiation and are not recommended.

Policy updated: May 2021

Policy endorsed: May 2021

Policy to be reviewed: May 2022

## **Enrolment and information for families**

When enrolling their child, families are:

- informed of the centre's sun protection policy
- asked to provide a suitable hat for their child, or purchase one from the centre
- asked to provide their child with suitable outdoor clothing that is cool and covers as much skin as possible
- required to give permission for staff to apply sunscreen to their child
- Families and visitors are encouraged to use a combination of sun protection measures (sun protective clothing and hats, shade, sunglasses and sunscreen) when participating in or attending outdoor activities with the centre

## **Staff WHS and role modelling**

As part of WHS UV risk controls and role modelling, when the UV radiation is 3 and above, staff:

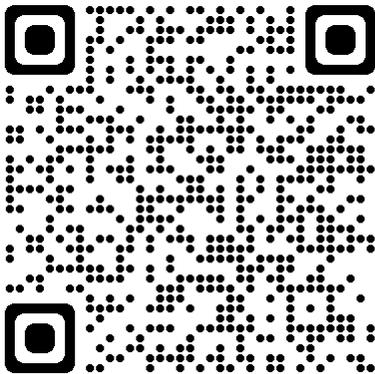

- wear sun protective hats, clothing and sunglasses when outside
- apply SPF 30 or higher broad spectrum, water resistant sunscreen
- seek shade whenever possible

## **Education**

- Sun protection is incorporated into the learning and development program.
- The sun protection policy is reinforced through staff and children's activities and displays.
- Staff and families are provided with information on sun protection through discussions with families and newsletters.
