

Philosophy Statement

P.R.I.D.E

Play based

The centre values the natural learning environment and educators believe children learn best through a progressive, play-based curriculum, emerging from children's own interests.

Relationships

Educators are welcoming and will develop respectful relationships with children, families and the community.

Inclusive

All children are cared for in a safe, inclusive and culturally supportive environment. We will work in partnership with families and the community to meet individual needs and value the cultures of all stakeholders.

Development

Wellbeing is central to children's development. We embed this by focussing on developing social and emotional wellbeing and supporting children to achieve their individual milestones.

Education

Families are the child's first educators. Staff will continue to learn with and from families and community organisations.
